project overviwe:

A Contact Manager is an application used to store, manage, and organize contact information such as names, phone numbers, email addresses, and other personal details. It helps users easily add, update, delete, and search contacts efficiently.

Objective:

- To store contact details in an organized way
- To allow users to add new contacts
- To edit existing contact information
- To delete unwanted contacts
- To search contacts quickly.

Features:

- Add Contact – Add a new contact with name, phone number, and email.
- View Contacts – Display all saved contacts.

- Edit Contact – Modify existing contact details.
- Delete Contact – Remove a contact from the list.
- Search Contact – Find a contact using name or phone number.

System Requirements:

Hardware Requirements

- Computer or Laptop
- Minimum 4 GB RAM
- Keyboard and Mouse

Software Requirements

- Operating System: Windows / Linux / Mac
- Programming Language: Java
- IDE: Eclipse / NetBeans / IntelliJ
- Java Development Kit (JDK)

System Architecture:

User Interface

- Allows users to interact with the system.

Contact Manager Logic

- Handles operations like add, delete, search, and update.

Data Storage

- Stores contact information in files or database.

Modules of the System:

Add Contact Module

- Allows the user to enter and save new contact details.

Display Contact Module

- Shows the list of all saved contacts.

Search Contact Module

- Finds a specific contact using a keyword.

System Design:

Modules of the System

1. **Add Contact**

- Name
- Phone number
- Email

2.View Contact

- Displays the list of saved contacts.

3.Search Contact

- Name
- Phone number

4.Update Contact

- Allows editing of existing contact details.

5.Delete Contact

- Allows removal of unwanted contact from the system.

Advantages:

- Easy to manage contacts
- Saves time when searching information
- Organized storage of contact details
- Simple and user-friendly system

Limitations:

- Limited storage depending on implementation
- No online synchronization (if basic version)

Conclusion:

The Contact Manager System is a useful application that helps users efficiently manage their contact information. It simplifies storing, searching, updating, and deleting contact details in an organized manner.
